Mighty Morphin Power Rangers The Movie is a seven stage hyper-action game with three sections in each stage except for Stage 7 which consists of two sections. Stages 1-6 consist of two sections of side scrolling game play followed by a one-on-one battle with a powerful Boss Monster. Stage 7 begins with a fierce one-on-one battle with Ivan Ooze after which you must try to escape from his deadly fortress before it self-destructs.

The Game Screen
You begin the game by selecting a Power Teen to battle through Stage 1. You can play in the foreground of the Game Screen, or you can jump to the background by pressing the L or R Button. The Game Screen shows your Life Meter in the bottom left hand corner. You get three lives per game. To the right of the Life Meter is the Power Meter. You can build up power by collecting objects along the way.

As long as the Power Meter is at least at two segments long, press the X Button in the Teenager Mode to execute a character's special move. When the Power Meter is full and flashing, press to morph to Ranger Mode. If the Power Meter is flashing in the
PowerRanger Mode, the character will automatically acquire their special weapon. The Power Meter will slowly deplete as you use this weapon. When the Power Meter is flashing, you can also execute each character’s special attack by pressing this Button. When you execute the special attack, the Power Meter will be fully depleted.

Each Power Teen also has their own devastating signature move that you can perform by pressing the Control Pad up + the Y Button. In the Power Ranger Mode, every Ranger has a vicious uppercut as their signature move.

Below the Power Meter is the score. You score points by defeating enemies along the way. The lower right hand corner shows the number of credits (continues) you have left. You begin the game with four credits. If your character loses his or her life three times during the game, you will advance to the Continue Screen. Use the Control Pad to highlight Yes or No and press the START Button to activate your choice.
In the 1 Player Mode, the words “Start Game” will flash to the right of the Power Meter. This indicates that a second player can enter the game at any time by pressing the START Button on the second controller. When the second player enters the game, the lower right side of the Game Screen will change to the Player 2 Life Meter, Power Meter, and Score.

After you clear each Stage, you will advance to the Stage Clear Screen where you can see how many bonus points you have received. These points are automatically added to your score before you advance to the Player Select Screen. You will also advance to the Player Select Screen when you use one of your Continue Game credits.

Power Ups
As you defeat Ivan Ooze's wicked minions, they will drop lightning bolts on the ground. When you pick them up they will provide you with more power. You will also encounter metal canisters which contain power ups. You must destroy these canisters to gain access to the power devices.
To win the Game, you must run, jump, climb, ski, surf, punch, kick, and battle your way through six levels of non-stop, adrenaline pumping action. And that is just to get a shot at Ivan Ooze in the Seventh Level. If you are skillful enough to defeat the baddest bad guy in Power Ranger history, you will have only 99 seconds to find your way out of his deadly fortress in order to win the game.
